

DEVELOPING A GREENER TOMORROW, TODAY

The UKA Group has around 880 employees and is currently active in Europe as well as in North and South America. As a full-service developer, UKA not only covers the entire value chain but also operates wind and solar parks itself. Founded in 1999, the company is one of the leading German project developers and currently has an onshore wind project pipeline of about 1.8 gigawatts pending approval in Germany. UKA has also grown strongly internationally in recent years. The UKA Group's current project pipeline for wind and solar projects now exceeds 14 gigawatts.

LOCATION STUART, FL

Full-time
starting immediately or as agreed

A company is only as good as its employees. That's why we don't care about sex, skin colour, religion or background. When it comes to being able to succeed in the renewable energy industry of the future, we are exclusively concerned with commitment and competence. As a team member, you can expect challenging and future-oriented jobs, appreciation for your teamwork and performance-related compensation.

Please submit your resume/CV, along with your availability and salary expectations, to HR@uka-group.com.

PROJECT RISK MANAGEMENT

THE ROLE:

- Systematically analyzing and reviewing as well as continuously monitoring and evaluating renewable energy projects (wind, solar, battery storage).
- Ensuring a consistently high project quality throughout the entire project development process.
- Early identification of risks in the project (e.g. land securing, interconnection, permitting).
- Supporting local developers and inhouse experts in mitigating or resolving issues.
- Working with local development team to prepare project milestone meetings.
- Supporting due diligence in M&A and financing processes of renewable energy projects.
- Reviewing and managing project documentation for the exchange of information with advisors, banks and investors.
- Creating standardized overviews and tables to track all essential project information.

THE INDIVIDUAL:

- A bachelor's degree in Business Administration, Law or a related field.
- 5 years of experience in energy project management, finance or auditing
- 3 years of experience working in renewable energy
- Strong attention to detail, analytical skills and a structured and conscientious way of working.
- Ability to work independently and meet deadlines.
- Adaptability, curiosity and ability to cope with a wide variety of tasks.
- Very good communication skills and assertiveness.
